

MultiCleaner

foaming - hp-cleaning - hydro extracting

The OERTZEN MultiCleaner combines three devices:

**foam generator
high pressure cleaner
hydro extractor.**

The MultiCleaner is especially suitable for cleaning and disinfection of sanitary rooms, swimming pools, kitchens, restaurants and all slip free floors or traffic areas.

Multi-cleaning starts with foaming up walls, areas or facilities to be cleaned.

After the foam has dispensed the dirt it is washed off by high pressure water.

The floor cleaning device with rotating nozzle bar will now be cleaning the floor and extracting contaminated water at the same time.

With the result that the floor is clean, safe and almost dry.

Technical data	MultiCleaner
flow rate	8 l/min
working pressure	60 bar
electric motor	230V/50Hz
tank volume	30 l clean water 30 l contaminated water
vac. power	1000 W
neg. pressure max.	217 mbar
dimensions (l x w x h)	650 x 530 x 1160 mm
weight	65 kg
order no.	10.000.805

Serial equipment: hp spray lance with hose (7 m) and quick coupling, foam lance, floor cleaning device with hydro extraction, water feeding hose 2 m, storage sack, discharging hose
